

MANSAROVAR LOGISTICS PVT. LTD.

Material Handling | Transportation | Slag Processing

Profile

Mansarovar Logistics Pvt. Ltd. (MLPL) is a solution provider in material handling, Slag processing, transporting services.

Focus on customer needs, unique solutions, quality, staff excellence, profitability, combined with specialization in the Steel and Mining industry in a wide variety of areas and techniques developed specially designed to meet the unique needs of each areas of services has contributed to its growth.

- It is a solutions provider focusing on unique applications to meet customer needs and exceed their expectations.
- It is a steel mill services provider.
- It is a mechanized screening solutions provider to leading iron ore mines in Eastern India. .
- It is a people centered organization – the people we serve and the people that make up our company.

History

Mansarovar Logistics Pvt. Ltd. was incorporated on 8th September 2006 at Jamshedpur. It commenced commercial operation from 1st April 2008 through the takeover of all the activities of the partnership firm M/S Jhanda Singh & Co. (Established on 24th December 1973 at Jamshedpur), a reputed service provider to Steel Mill and Iron Ore mines in Eastern India. The directors of this company were also the only partners of the above firm.

Major Customers

TATA STEEL

TAYO ROLLS LTD., Jamshedpur

HIMALAYA STEEL MILL SERVICES PVT LTD (J.V. of EDW. C. Levy of USA and TATA STEEL LIMITED).

The Company is registered as an A-class service provider. It undertakes fully mechanized material handling solutions for various scrap, transportation and segregation of metallic and non-metallic pieces from slag. It has also undertaken surface grinding of slabs and billets.

yes ! we can do it !!

Through its experienced and dedicated team it has the ability to address bottlenecks in material handling and processing practices, enabling device and implement safe, efficient and cost effective solutions for its customers.

- Already implemented Improvisation in scrap transportation efficiency with Skull carriers (One of its kind in India) and Heavy duty Self tipping trailers/dumpers for higher efficiency, safety and minimizing material handling equipments at Tata Steel, Jamshedpur in their newly commissioned LD#3.
- Improvising on operational methods adopted for efficient Worked through Slag Processing.
- Improvising throughput of segregation of metallic and non metallic pieces from slag with mechanized feeding of segregated slag with mobile feeder conveyer combined with mobile link conveyers.
- Improvising scrap handling efficiency with Wheel mounted mobile material handlers with assorted attachments.
- Identification of alternate technology as opposed to 'drop balling' for increased efficiency and safety in breaking and processing of skulls and jams.
- Identification of Mobile scrap processing machine for light, medium and heavy ferrous scraps processing.
- Identification of Mobile/static magnetic separator plants/allied equipments/mobile stackers-conveyors for processing of ferrous and non ferrous material from slag.

While MLPL is in the business of metal recovery from slag, involving consequential environmental degradation (high dust generation) and likely to leave behind adverse footprints, due concern for a Green Earth leads MLPL to empathize and emphasize on unique operational measures to establish and maintain a conducive and sustainable environment.

This can be evidenced from photos of its plant surrounded by trees and greenery reflecting MLPL's commitment in maintaining a Green Earth.
